Enabling Innovation in Europe

Hacker Spaces, Startups, and a new approach to social movements

Great things rarely happen just because of good people or great ideas. For something interesting to happen opportunity, vision, and the ability to execute must come together.

Why are there so few European ICT startups?

If you've been following EU Reports on Innovation, you can see how bad the situation is already. In the words of the former Finnish Prime Minister, Mr. Esko Aho, in what is the European Union's prime document outlining a strategy for creating an innovative Europe:

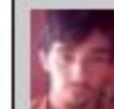

"Europe and its citizens should realize that their way of life is under threat[...] This society, averse to risk and reluctant to change, is in itself alarming but it is also unsustainable in the face of rising competition from other parts of the world."

This talk explores Europe's seeming inability to innovate in ICT, looks for explanations from the perspective of founders, and tries to offer solutions to Europe's Innovation Dilemma.

9) The Trust Problem

How can I trust people? There are lots of freaks out there. They steal. I can't open up my space to the world!

- Don't be Microsoft. The problems of being closed and exclusive are much, much worse than the problems of being open and inclusive
- Also, freaks make good minions

Worldwide Aaron Swartz Memorial Hackathons

In memory of hacktivist [Aaron Swartz](#), there will be a series of hackathons around the world in Jan.-Feb., 2013 dedicated to understanding Aaron's work and keeping his projects alive. This page is intended as a record of what was done at each of these hackathons. If you'd like to suggest project ideas or help organize stuff, see the [coordination spreadsheet](#). You can contact [the main coordinator](#) for the worldwide effort via [email](#).

In order to provide some online continuity between events please feel free to use the [#aaronsw](#) IRC channel, and the [#aaronsw](#) tag.

Geeks & Depression meetup (in San Francisco)

written by [maltman23](#) on Monday, November 21st, 2011 at 2:03 pm

Geeks & Depression meetup

Tuesday, 6-December, 7:30pm

No Starch Press, 38 Ringold Street, San Francisco, CA 94103

(near Civic Center BART Station)

Let's have a meetup where geeks can talk about depression and suicide. You are not alone. Share your story, if you like. Share a friend's story. Or just hang out and listen. Let's make it OK to talk about these things so that we don't feel so alone with our feelings of being alone and depressed or suicidal.

This is not a support group — none of us are trained professionals, but we can get together in a safe, confidential space to talk about depression and suicide — an important part of life for so many of us geeks.

If others elsewhere in the world feel like creating their own meetups, please do.

[Safe Space Meetups/Workshop](#)

Dates / Termine

- 2013-01-04, 20.00: writing a petition/open letter to the hacker community/the CCC(?) to voice opinions concerning sexism/discrimination.

Background / Hintergrund

The idea of regular "Safe Space Meetups" was put forward during the 3rd [Genderissue Treffen](#) (gender issue meetup) on 3 Jan 2013, which had been called following sexist incidents at 29C3. (The two previous gender issue meetups had been brought about by heavy discussions on the topics of sexism and (in)appropriate behaviour towards others on Metalab's internal mailing list)

Johannes Grenzfurthner/Frank Apunkt Schneider (monochrom)

// HACKING THE SPACES

A critical acclaim of what was, is and could be a hackerspace (or hacklab, for that matter)

// Hackerspaces 1 // History

The history of the so-called hackerspaces expands back to when the counter culture movement was about to make a serious statement. In the decade after the hippies attempted to establish new ways of social, political, economical and ecological relationships, a lot of experiments were carried out concerning the construction of new spaces to live and to work in. These were considered as niches to relieve and rescue people from the monotonous way bourgeois society directed civic spaces from kindergartens to cemeteries to be exactly the same and to reproduce its patriarchal and economical order. The politics of establishing open spaces were meant as explicit statements confronting a capitalist (and in the East: an authoritarian communist) society whose very structure, purpose and operating mode were broadly considered to "alienate humans", to take control of and to modify their basic human needs and

cooperate with the packs of geeky guys (or at least they might think so). What is needed is the non-repressive inclusion of all the groups marginalized by a bourgeois society just as it had been the intention of the first hackerspaces in countercultural history. If we accept the Marxian idea that the very nature of politics is always in the interest of those acting, hackerspace politics are for now in the interest of white middle-class males. This needs to change. Well, that's all for the moment. Let's start to work on this and see what would happen if we change the somehow boring hackerspaces of the present into some glamorous factories of an unpredictable freedom for all of us even those who do not fit in the classical nerd scheme. Change the nerds. Make them a better space. For you and for me and the entire human race.

//

(Thanks to Jens Ohlig for comments and advice. Thanks to Melinda Richka for grammar-slashing.)

HackspaceWiki>About

hackspaces.org was created in response to [hanhaiwen's German blog article](#) criticising that hacker can be construed as a male-centric term, and therefore *hackerspace* excludes a lot of people the community would actually love to welcome.

I felt a duplicate effort of **hackspace** listings would be pointless, and thought instead a proxy/filter combination would hopefully contribute to show the community's ability to transform. It was inspired by and shares code with the [Noisebridge](#) parody site [Nosebridge](#) and was implemented during the [Hackathon 8](#) at [Metalab](#).

Logging in works by now, but editing is not yet supported (ha...)

Feel free to contact [mzeltner](#) for any questions regarding **hackspaces.org** and the [friendly staff league](#) for *hackerspaces.org*!

Noisebridge

We are Noisebridge

Noisebridge is an infrastructure provider for technical-creative projects, collaboratively run by its members. We are *incorporated* as a non-profit educational corporation for public benefit. We operate primarily in a 5,200 square-foot space located in the heart of San Francisco. We teach, we learn, we share. [Read more about Noisebridge](#) or [watch a short video](#)...

Create With Us!

Our 5,200 square-foot space (483m²) contains an [electronics lab](#), [machine shop](#), [sewing/crafting supplies](#), [two classrooms](#), [conference area](#), [library](#), [darkroom](#), and [kitchen](#). Everyone is welcome to use our many resources. Find others to create with. Find help with your projects. Help others with their projects. Learn, teach, share. Come to Noisebridge and create!

Noisebridge's [hours](#) are 24 hours a day, 7 days a week. New visitors are welcome any time (all ages, all skill levels), but it's best to visit in the evenings or during an event to make sure we have a volunteer to show you around and make introductions.

Nosebridge

We are Nosebridge

Nosebridge is an infrastructure provider for technical-creative projects, collaboratively run by its members. We are [incorporated](#) as a non-profit educational corporation for public benefit. We operate primarily in a 5,200 square-foot space located in the heart of San Francisco. We teach, we learn, we share. [Read more about Nosebridge](#) or [watch a short video](#) ...

Goto 2169

We're located at:
2169 Mission St, San Francisco
[OpenStreetMap](#)  - [Google Maps](#) 
 2 blocks South of 16th & Mission

MISS BALTAZAR'S LABORATORY

Mz Baltazar's Laboratory is a weekly event taking place in Vienna (Austria), specifically for persons who call themselves women or trans. If you love to make things, rather than consuming them, meet up at Mz Baltazar's to share your skills. Mz Baltazar's participants come from different backgrounds, ages and mindsets to exchange equipment, build circuits, play with DIY electronics and interactive art. We encourage each other to learn new tools and collaborate. All workshops are free in order to offer a fearless, accessible platform to tinker with male connotated toys. The artwork created at Mz Baltazar's Laboratory is generated with Open Source Soft- and Hardware. We see the process of demythifying technology as a fun way to articulate ourselves and become creative.

CryptoParty

What is **CryptoParty**? Interested parties with computers, devices, and the desire to learn to use the most basic crypto programs and the fundamental concepts of their operation! CryptoParties are free to attend, public, and are commercially and politically non-aligned. CryptoParties are absolutely against sexual harassment and discrimination.

Privacy is necessary for an open society in the electronic age. Privacy is not secrecy. A private matter is something one doesn't want the whole world to know, but a secret matter is something one doesn't want anybody to know. Privacy is the power to selectively reveal oneself to the world. ~A Cypherpunk's Manifesto by Eric Hughes, 1993 [↗](#)

NEWS: The CryptoParty Handbook v1.1 has been released - download or edit [here](#) .

Global Meetups

Alpha sorted by Country / State or Province or Territory / City
Confirmed Dates only please

Africa

- [Tunis](#) / Tunisia

Asia

#CryptoParty!

Auf der Daten.Netz.Politik hatten wir schon eine kleine mini-#CryptoParty - jetzt brauchen wir eine Follow-Up Veranstaltung mit Install-Party, Keysigning, mehr Diskussion, Fragen und Austausch.

Austausch/Nicht-regulaere Termine: [Mailingliste](#) !

-> Nächstes Treffen: MO, 25. Feber 2013. Ab 19 Uhr Ort und Thema werden noch bekannt gegeben.

(Reguläreres Treffen: jeden letzten Montag im Monat!)

Melde Dich auch auf der [CryptoParty Mailingliste](#) an um an Diskussionen teilzunehmen und Vorschläge einzubringen. Du kannst dort auch Fragen stellen und Antworten geben.

Dokumentation zu den österreichischen CryptoParties gibt's unter <https://cryptoparty.at/>

Zielgruppe

- **Zukuenftige AnwenderInnen** (vorallem _nicht TechnikerInnen_, von Privatpersonen zu JournalistInnen ...)
- Crypto-Infrastruktur Admins (Tor nodes, Convergence Notaries, Synchronised Keyserver Admins, etc.)
- EntwicklerInnen
- [cypherpunks](#) 2

Kontakt / Leute die das interessiert

CryptoParty

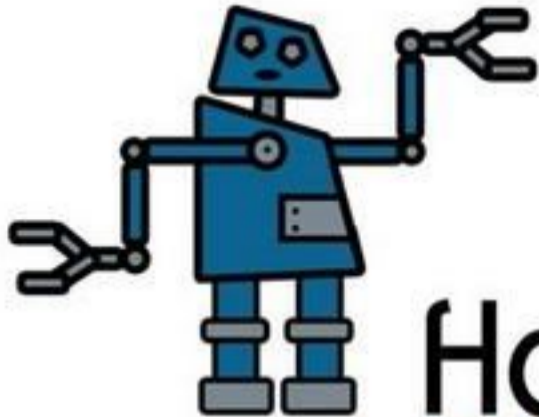

aktiv

Thema:	Niederschwelliger Einstieg zum Thema Privatsphäre im Internet, Kryptographiesoftware und die Dinge die man beachten sollte
Organisator:	Jeder der mag, fallback: pepi & mzeltner
Email:	https://lists.transist.or.at/listinfo/cryptoparty/
Homepage:	https://cryptoparty.at/
IRC/XMPP MUC:	cypherpunks@conference.jabber.metalab.at
Treffen:	Nicht immer im Metalab! Jeden letzten Montag im Monat
Zielgruppe:	Zukünftige AnwenderInnen von (E-Mail) Verschlüsselungstechnologie, Anonymisierungssoftware, Crypto-Infrastruktur-Admins, EntwicklerInnen, cypherpunks
Zuletzt aktualisiert:	25.02.2013
